Making Things Better

OUR PEOPLE

OUR PRODUCT

OUR COMMUNITY

This is OUR Dryden Pulp Mill

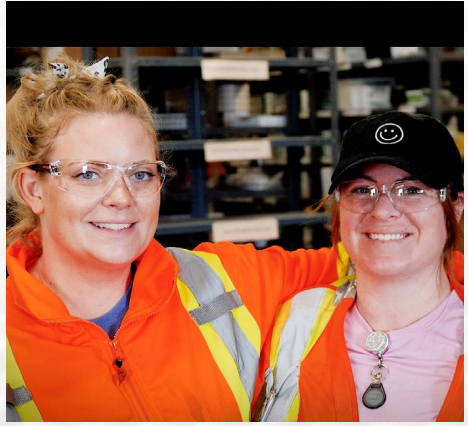

How we do things in our community is just as important as what we do. We work hard to ensure that we are managing our business responsibly and sustainably embracing these as core guiding principles to serve as the foundation of our business.

Our vision is **MAKING THINGS BETTER - OUR PEOPLE- OUR PRODUCT- OUR COMMUNITY.** We do this by producing the highest quality product we can while ensuring sustainable operations, both in the facility and in the forest. Our people are the backbone of our operation. We strive to make our work environment a great place to be while we develop the future leaders of our organization. Investing where we live, work and play is important to all of us. That's why we have a robust community investment program and encourage employee volunteerism.

Dryden is our home and like any home, we want to take care of it. We have been operating here for more than 100 years and we look forward to a long sustainable future ahead of us.

This is our Dryden Pulp Mill.

OUR PEOPLE

At Dryden Fibre Canada we have a diverse and talented workforce who provide a vast range of skills and expertise. In our organization you will find:

- Various trades people including both Red Seal Trades Professionals and apprentices
- Various Engineers including electrical, environmental, process, reliability and mechanical
- Power Engineers
- Foresters
- Office-based employees in various departments including accounting, scheduling, human resources, stores and other administrative roles
- Operations employees working in various departments in control rooms, labs and as support services

We provide co-op education opportunities to local high school students and we employ numerous post-secondary students throughout the summer months.

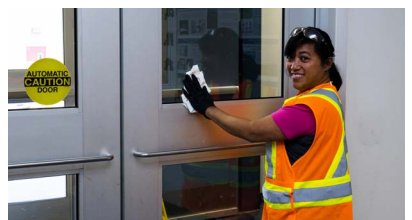

Approximately **400** mill employees.

Approximately **64** full time and seasonal contractors.

More than **20** highly skilled Emergency Response Team members trained and ready to address **ENVIRONMENTAL** or **SAFETY** situations.

OUR PRODUCT

We manufacture **NORTHERN BLEACHED SOFTWOOD KRAFT (NBSK)** pulp. With one fibre line producing 327,000 air-dried metric tons annually, our high-quality product is used in the manufacturing of a variety of consumer products including premium paper towel, tissue products and specialty grade papers.

Our operations are located in the heart of the Boreal Forest in Northwestern Ontario. The forests that support our facility provide us with approximately 1.9 million cubic meters of wood fibre annually. We follow a rigorous forest management planning process which is overseen by the province of Ontario. Dryden Fibre Canada is licensed to manage two Sustainable Forest License (SFL) areas; the Trout Lake and Wabigoon Forests and we are certified to third party standards to verify that the product we produce in Dryden comes from sustainable and well managed forests. **The fact we have been doing this for over 100 years demonstrates our success and our commitment to sustainability.**

THOUSANDS

of dollars invested in scientific research to enhance sustainable forest management practices.

Over **90%** of our pulping chemicals are captured and reused in our manufacturing process.

MILLIONS OF TREES

planted annually on the Trout Lake and Wabigoon Forests.

85.5% of the energy we use is carbon neutral.

Utilizing, on average, **90,000** tonnes of biomass annually.

OUR COMMUNITY

We are committed to localized outreach and support focused on organizations, initiatives and projects that can improve the quality of life in our operating community.

Our engagement work also focuses efforts to foster public understanding of the positive impact of the forest sector and sustainable forest management.

Nearly **\$10,000** annually in local scholarships through Dryden High School, Ignace School and the Outland Youth Employment Program (OYEP).

OVER 20 YEARS supporting the Outland Youth Employment Program (OYEP) for Indigenous Youth.

100's of books distributed within the community to promote literacy.

Our **DIFFERENCE MAKERS** program engages employees in numerous community activities.

Nearly **\$100,000** given annually to **LOCAL** non-profit and community initiatives.

OVER 65 YEARS of educating youth in sustainability and resource management.

Our Mission

Together we safely, economically, and sustainability
produce premium, high-quality pulp.
